

MCS 160 – 4S

Electrical requirements

Voltage:	400V 3-phase-current with neutral (stability $\pm 5\%$)
Power:	12,1 KVA
Fuses:	3 x 25A

Compressed air

Operating pressure:	6 bar
Requirement:	120 NL / min (dry air)
Purity:	free of water and oil

Weight:

Total weight:	app. 800 kg
Foundation:	200 kg / m ² max. load

Environmental conditions:

Ambient temperature:	+18° C to 25° C
Relative humidity:	50% up to 70% no condensation

Performance data:

Working area:	1.600 mm x 1.200 mm
Material-fixing	3 chamber vacuum table
Maximum speed:	30 m / min
Repetition accuracy:	$\pm 0,02$ mm

Door Width:

Min. Door Width	2.300 mm
